

The diagram shows the orthographic projection of a cone. On the left is the top view, which consists of two concentric circles. The outer circle represents the base of the cone, and the inner circle represents the top surface. A horizontal centerline and a vertical centerline intersect at the center of the circles. On the right is the front view, which is a trapezoid representing the cone's profile. The top horizontal edge of the trapezoid is aligned with the centerline of the top circle, and the bottom horizontal edge is aligned with the centerline of the base circle. A horizontal centerline passes through the middle of the trapezoid, with a dashed line segment in the middle to indicate it is hidden from view.
